(Note) Revisions to financial forecasts published most recently: Yes

It is difficult to reasonably calculate the effect of the coronavirus pandemic, and the financial forecasts for the fiscal year ending March 31, 2021 have yet to be determined. We will promptly announce financial forecasts for the fiscal year when the calculation is possible.

* Notes

(1) Any changes in important subsidiaries during the three months ended June 30, 2020 (any changes in specific subsidiaries accompanied by a change in the scope of consolidating): None

Newly added: None

, Eliminated: None

(2) Adoption of accounting treatment unique to the preparation of quarterly consolidated financial statements: None

(3) Any changes in accounting policies and changes or restatement of accounting estimates

Changes in accounting policies associated with the revision of accounting standards, etc.: None
 Changes in accounting policies other than the above: None
 Changes in accounting estimates: None
 Restatement: None

(4) Number of shares issued (common stock)

1. Number of shares issued as of the term end (including treasury shares):	June 2020	82,623,376 shares
	March 2020	82,623,376 shares
2. Number of treasury shares as of the term end:	June 2020	1,739,702 shares
	March 2020	1,744,611 shares
3. Average number of shares during the term:	June 2020	80,880,367 shares
	June 2019	81 246 074 shares

The consolidated financial summary is not included in the scope of the quarterly review by certified public accountants or audit corporations.

Statement regarding the proper use of financial forecasts and other special remarks

The forward-looking statements, such as results forecasts, included in this document are based on information currently available to the Company and certain assumptions considered reasonable, and the Company makes no representations as to their achievability. Actual results may differ materially, depending on a range of factors. Please refer to page 3 "1. Qualitative Information on Consolidated Results, etc. for the First Quarter Ended June 30, 2020 (2) Explanation of Information on Future Forecasts Such as Consolidated Financial Forecasts" for information on matters related to financial forecasts.

1. Qualitative Information on Consolidated Results, etc. for the First Quarter Ended June 30, 2020

(1) Qualitative Information on the Consolidated Results

The sense of uncertainty about the global economic outlook further increased during the first three months of the consolidated fiscal year ending March 31, 2021, as economic activity stagnated due to the coronavirus pandemic, amid escalation of trade friction attributable to protectionist economic policies. In the U.S., exports continued to sink, the employment situation worsened, and consumer spending weakened. European economies continued to see decline in domestic demand and showed a slowdown in growth mainly in the manufacturing industry. In Asia, the economies were generally weak, and the Chinese economy continued to slow.

In the Japanese economy, the coronavirus pandemic led to declines in consumer spending, production and exports, and corporate capital expenditure also remained lackluster.

The Group's business environment remained challenging overall, reflecting sluggish demand in the automotive sector despite hardly any fall in demand in the semiconductor and electronics component industries due to the coronavirus pandemic.

In this operating environment, the Group took steps to control the spread of the coronavirus while also continuing to focus its sales activities on boosting sales of both key products and new businesses in Japan and overseas and working to expand the production/supply systems as well.

As a result, consolidated net sales during the first quarter under review stood at \$18,332 million (down 5.7% year on year). Operating profit amounted to \$1,359 million (down 25.3% year on year), ordinary profit was \$1,581 million (down 12.9% year on year), and profit attributable to owners of parent stood at \$1,251 million (down 2.9% year on year).

Consolidated results by segment are as follows.

1) Electronic Devices segment

In the Electronic Devices segment, overall sales were lower than the year-ago level, reflecting weak shipments particularly of automotive input devices, mainly due to lackluster demand in the automotive sector amid the coronavirus pandemic.

In the business of input devices, sales were weak, reflecting lackluster shipments of automotive key switches as well as slow growth in shipments of touchpads for slim notebook personal computers.

Sales of display-related products fell sharply, reflecting a continued poor performance in LCD connectors combined with sluggish shipments of view-control films (VCFs) for optical applications.

Sales of component-related products grew considerably, reflecting steady shipments of electronic-part testing connectors.

As a result, segment sales amounted to \(\frac{\pma}{4}\),417 million, down 9.8% year on year, and segment operating profit was \(\frac{\pma}{103}\) million, down 72.5% year on year.

2) Precision Molding Products segment

In the Precision Molding Products segment, overall sales were higher than the year-ago level as shipments of semiconductor-related containers and carrier tape-related products held firm.

Sales of semiconductor-related containers grew, reflecting steady shipments for 300-mm wafer in-process containers on the back of firm demand in the semiconductor industry.

Sales of office automation equipment decreased from a year earlier due to absent growth in demand for development rollers for laser printers as mainstay products.

Sales of carrier tape-related products grew strongly amid gradual recovery in demand for electronic components for smartphones and 5G base stations.

Sales of silicone rubber molded products generally remained flat despite steady sales of mainstay medical equipment.

As a result, segment sales stood at \$8,328 million (up 4.4% year on year) and operating profit was \$1,152 million (down 3.6% year on year).

3) Housing & Living Materials segment

In the Housing & Living Materials segment, the Company implemented new pricing, worked to increase production efficiency, and promoted sales of products in new businesses amid the extremely harsh market environment of PVC products, however, growth in overall sales was slower than previous year, impacted by weak demand for food packing materials, construction materials and automotive-related materials.

In the segment of packing materials such as wrapping films, sales were weak, reflecting poor shipments overall, with firm sales to supermarkets offset by a slump in sales to the food service industry.

Sales of PVC pipes and related products were below the level a year earlier due to the failure to maintain the shipment volume amid intensifying market competition.

Sales of functional compounds were lackluster, reflecting continued sluggish shipments of robot cables coupled with a slowdown in the growth of automobile-related demand.

Sales of exterior materials were solid due to efforts to maintain a strong performance such as implementation of price revisions and expansion of sales to new customers.

Sales of conductive polymer, a new business product, were weak in the absence of recovery in orders for use in automotive electronic components despite steady shipments for use in smartphone components.

As a result, segment sales stood at ¥4,126 million (down 13.4% year on year) and segment operating profit was ¥32 million (down 79.8% year on year).

4) Others segment

Overall sales were down from the year-ago level due to a decrease in orders for new construction and renovation of commercial facilities, particularly in Tokyo and neighboring areas, and the interior construction of public facilities in the construction business, reflecting weak demand amid the coronavirus pandemic.

As a result, segment sales amounted to \$1,460 million (down 18.7% year on year) and operating profit was \$70 million (down 18.3% year on year).

(2) Explanation of Information on Future Forecasts Such as Consolidated Financial Forecasts

The outlook across all aspects including economic activity, the business environment and the employment situation, remains uncertain amid the huge impact of the coronavirus pandemic on the Japanese economy and the wider global economy not to mention other factors such as the trade friction between the U.S. and China.

Looking at the business environment surrounding the Group, demand is likely to be relatively firm in the semiconductor industry and the electronics components industry. Meanwhile, the pace of recovery for demand in the automobile industry is expected to be slow due to the coronavirus pandemic.

Under these circumstances, the Group will ensure optimal production locations and further rationalize manufacturing to minimize the impact of the slump in automotive demand caused by the coronavirus pandemic. The Group will also ensure good workplace hygiene and alter work styles to prevent the spread of the coronavirus amongst employees as well as strengthening BCM in case of shutdown.

The consolidated results for the first half of the fiscal year ending March 31, 2021 are expected to include sales of \(\frac{\pmathbf{x}}{35,000}\) million, operating profit of \(\frac{\pmathbf{x}}{2,600}\) million, ordinary profit of \(\frac{\pmathbf{x}}{2,800}\) million, and profit attributable to owners of parent of \(\frac{\pmathbf{x}}{2,100}\) million. In addition, with respect to forecasts of dividends, the annual dividend per share remains unchanged from the previous year, or \(\frac{\pmathbf{x}}{18}\) (the end of the second quarter: \(\frac{\pmathbf{y}}{9}\); the end of the fiscal year: \(\frac{\pmathbf{y}}{9}\).
